

Motif knrl, accessibility score differences by loop type for Neurons, group 000

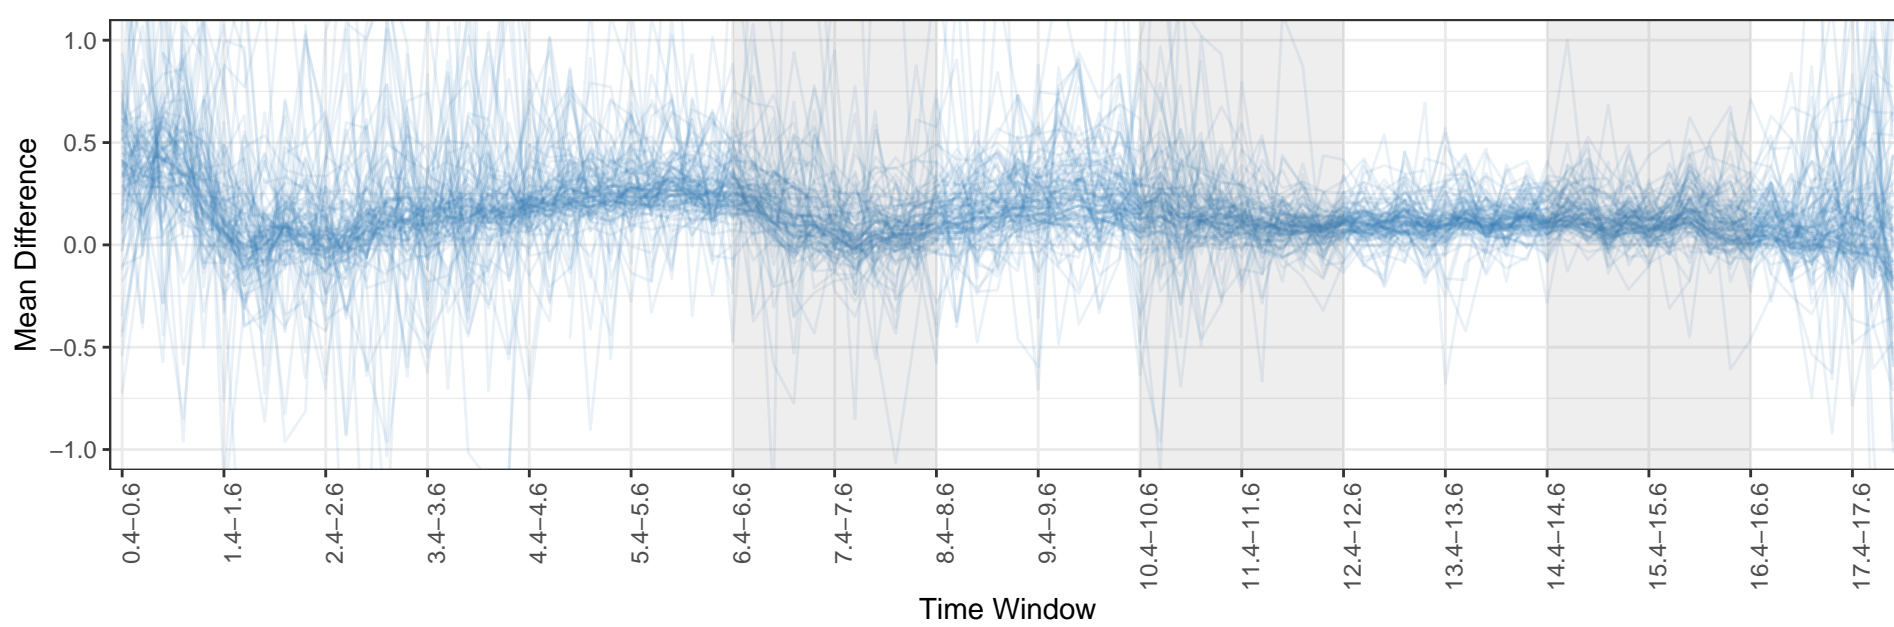

Motif knrl, accessibility score differences by loop type for Neuroblasts, group 000

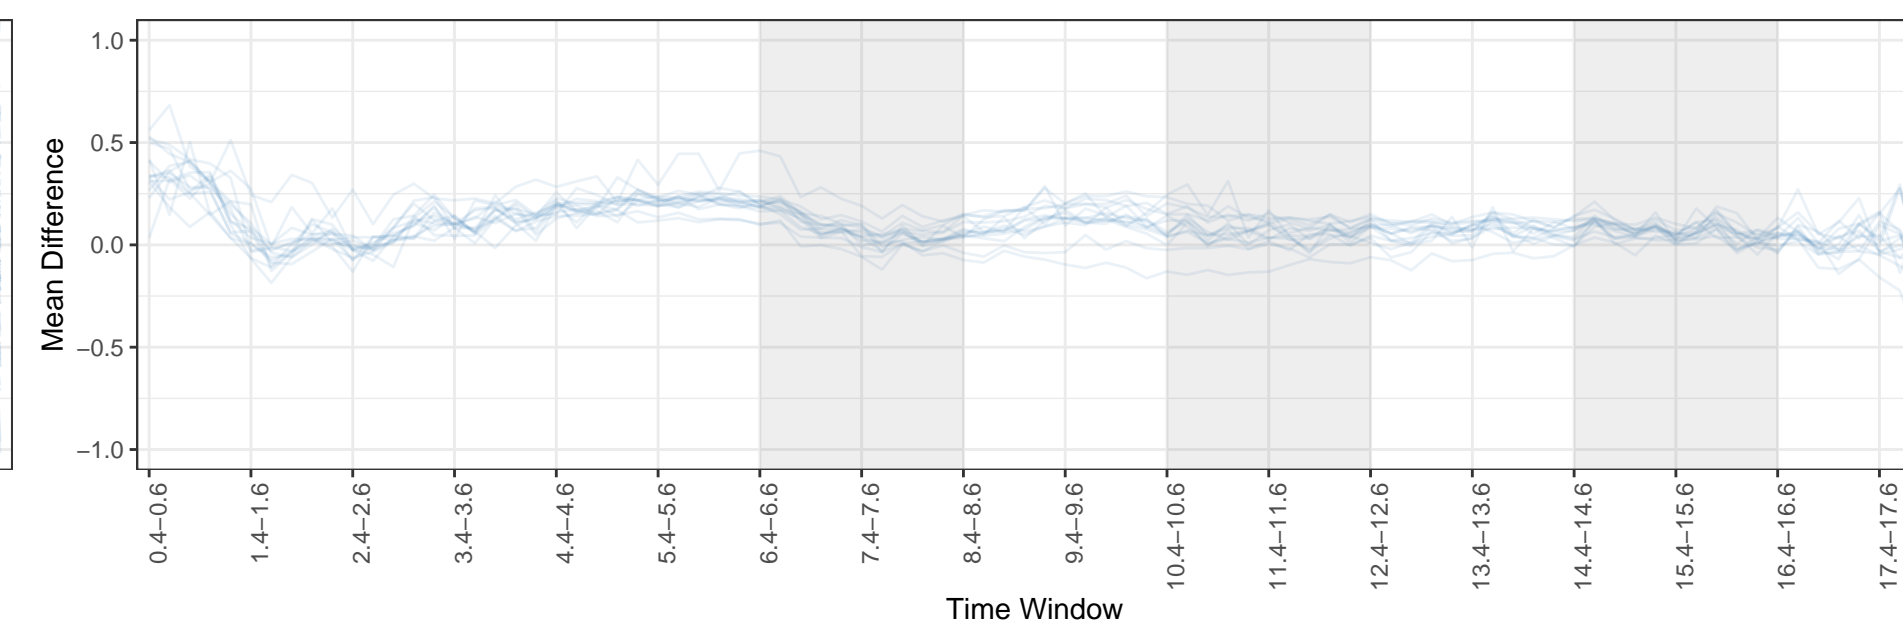

Motif knrl, accessibility score differences by loop type for Glia, group 000

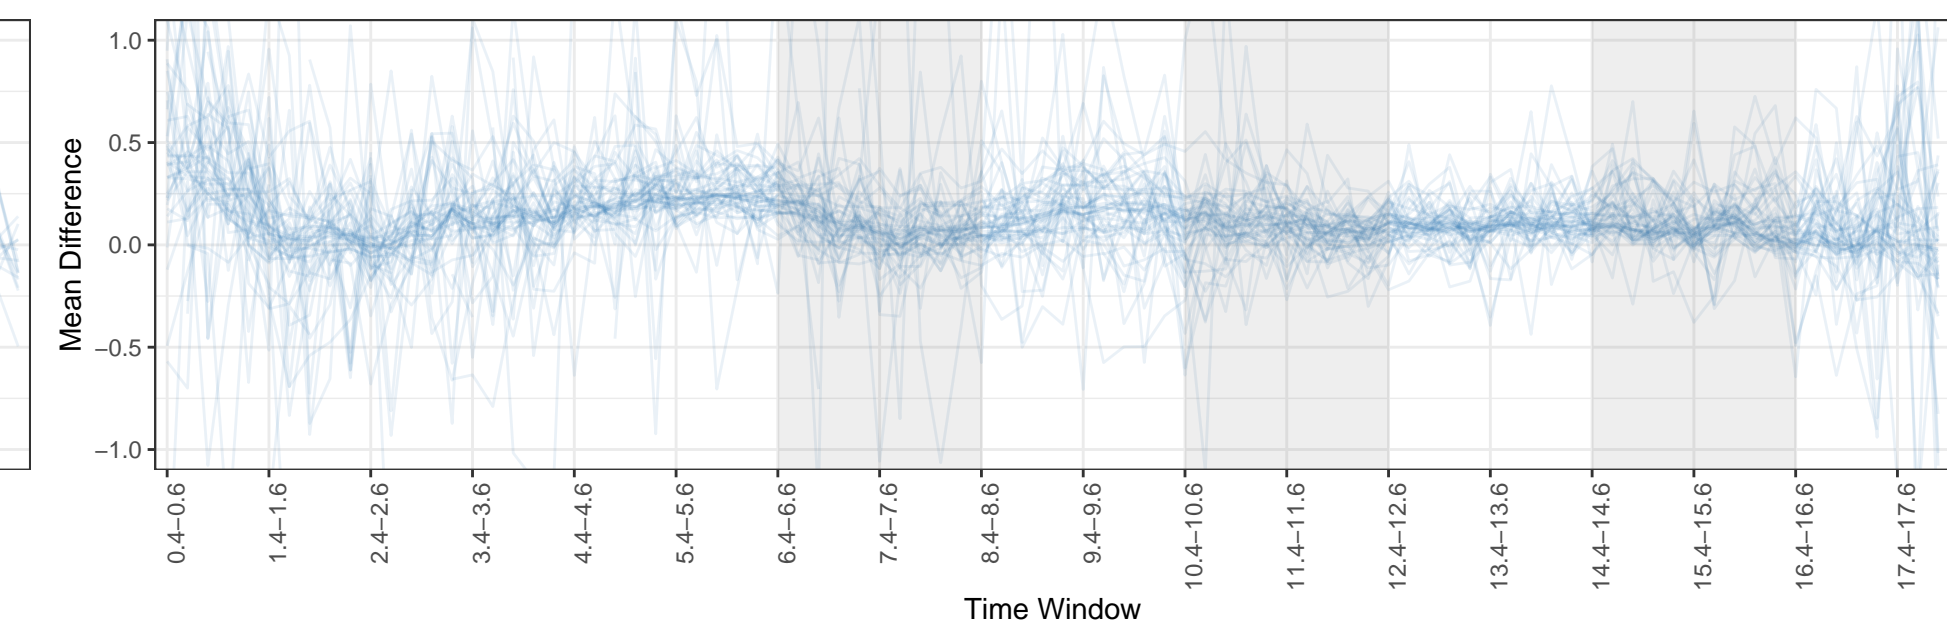

Motif knrl, accessibility score differences by loop type for Neurons, group 001

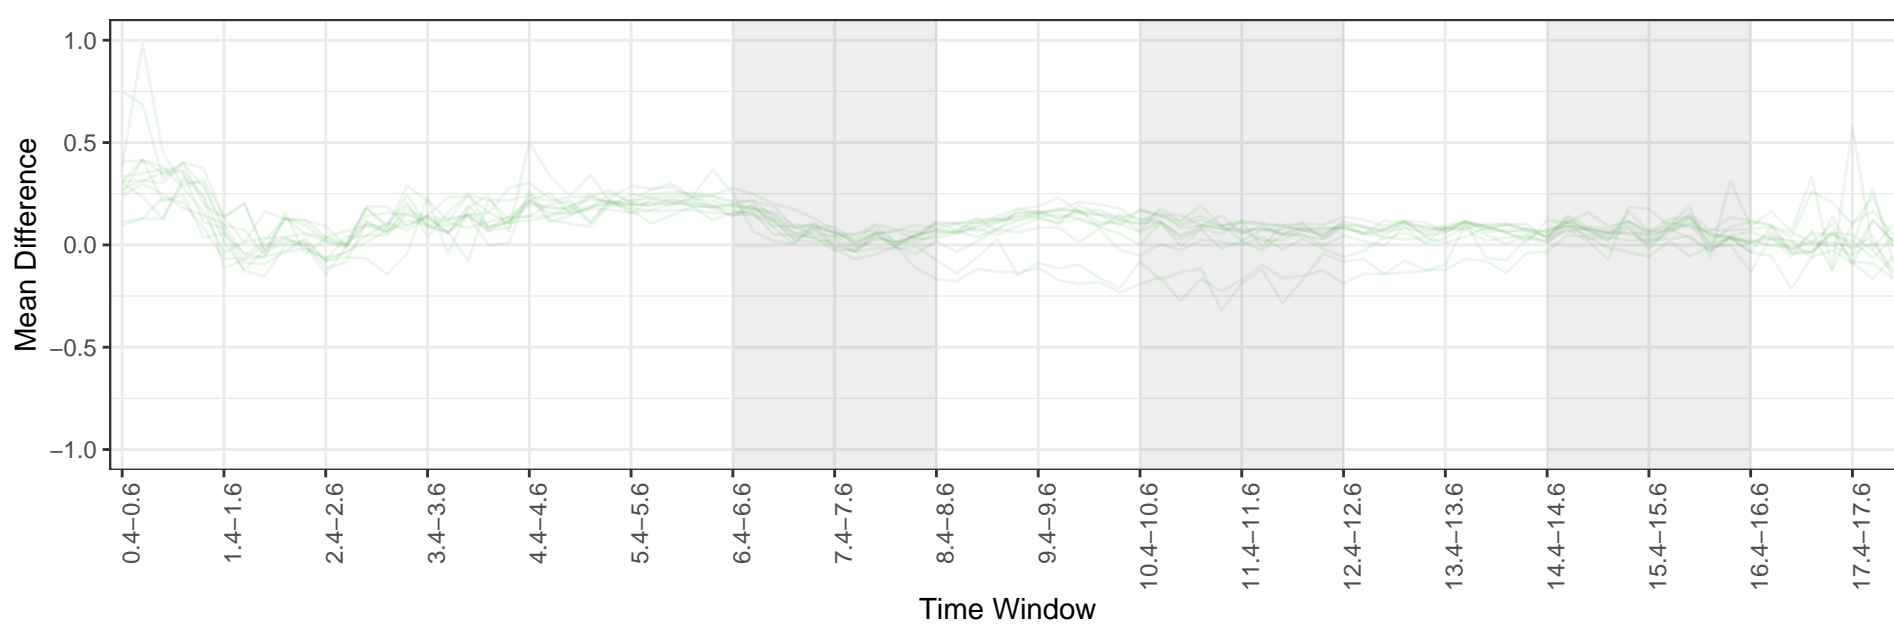

Motif knrl, accessibility score differences by loop type for Neuroblasts, group 001

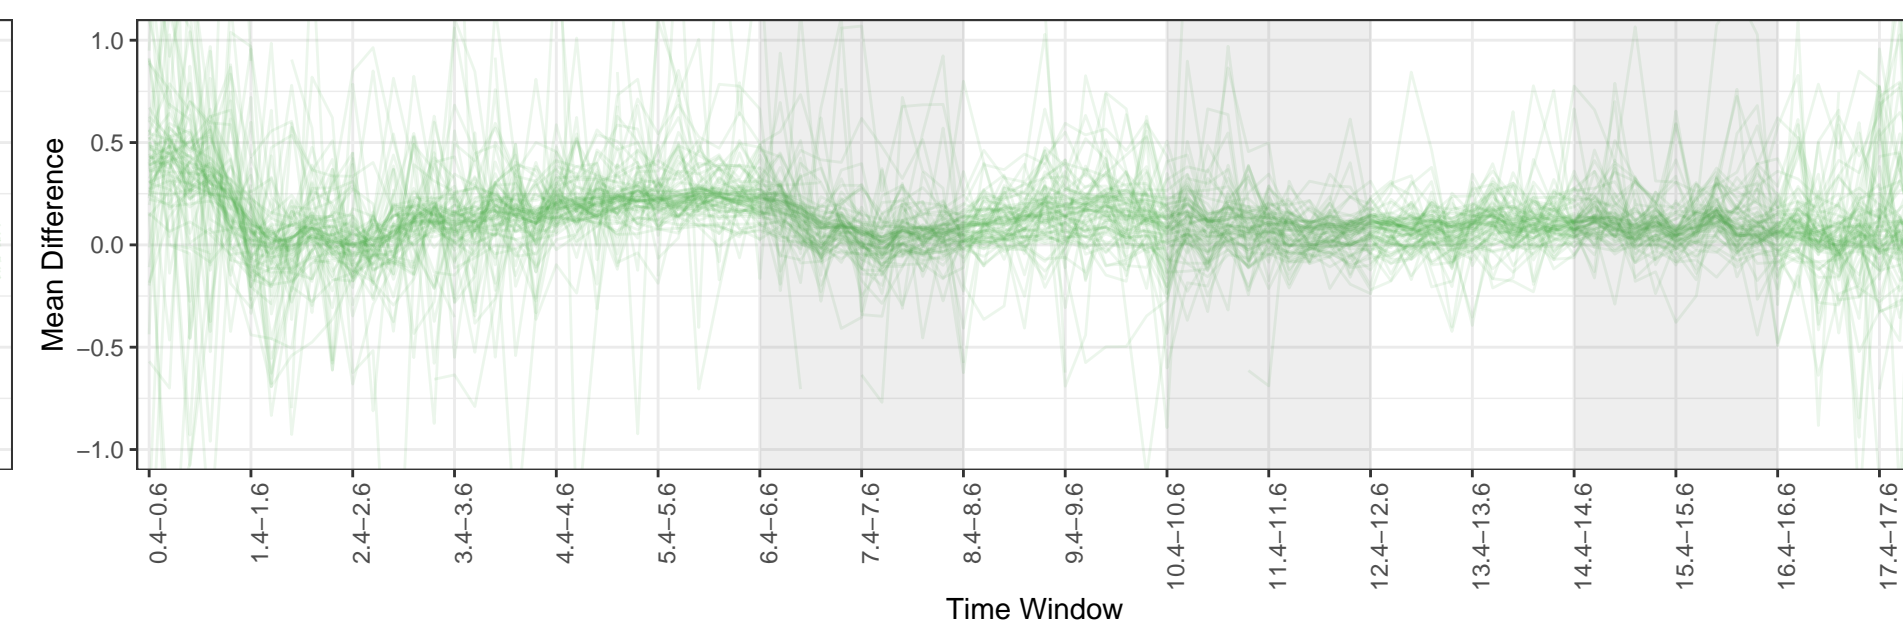

Motif knrl, accessibility score differences by loop type for Glia, group 001

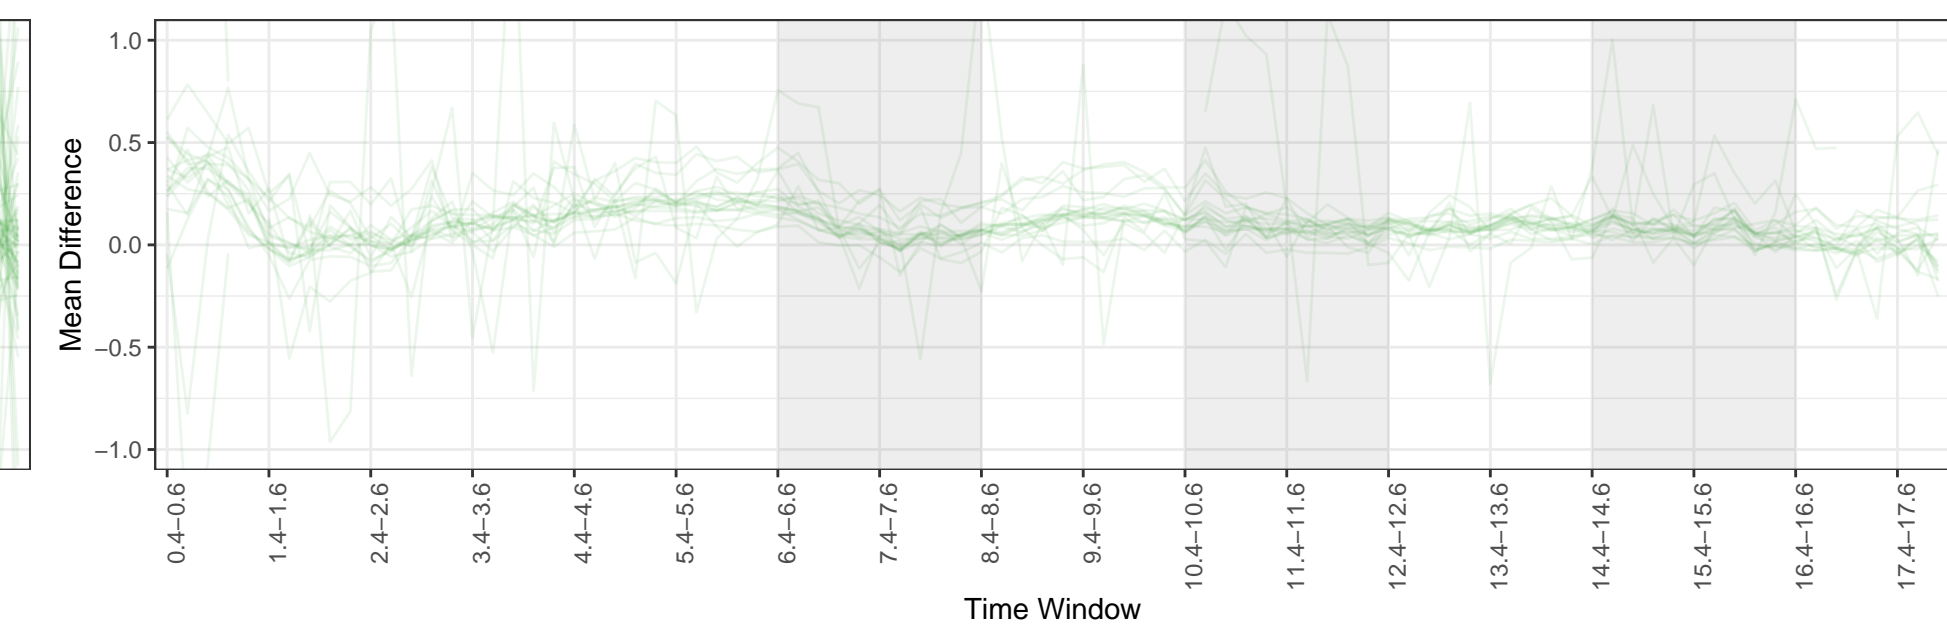

Motif knrl, accessibility score differences by loop type for Neurons, group 010

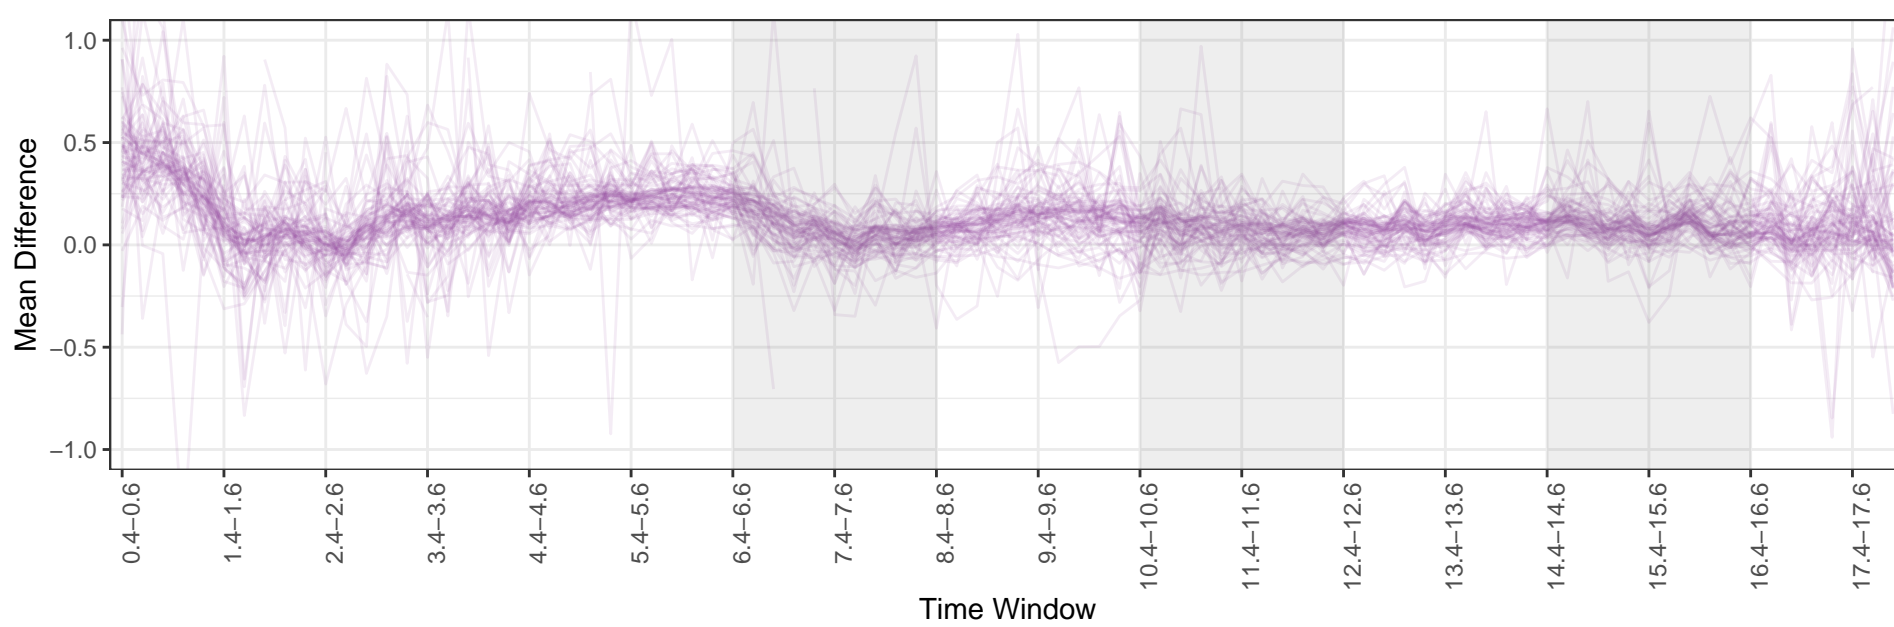

Motif knrl, accessibility score differences by loop type for Neuroblasts, group 010

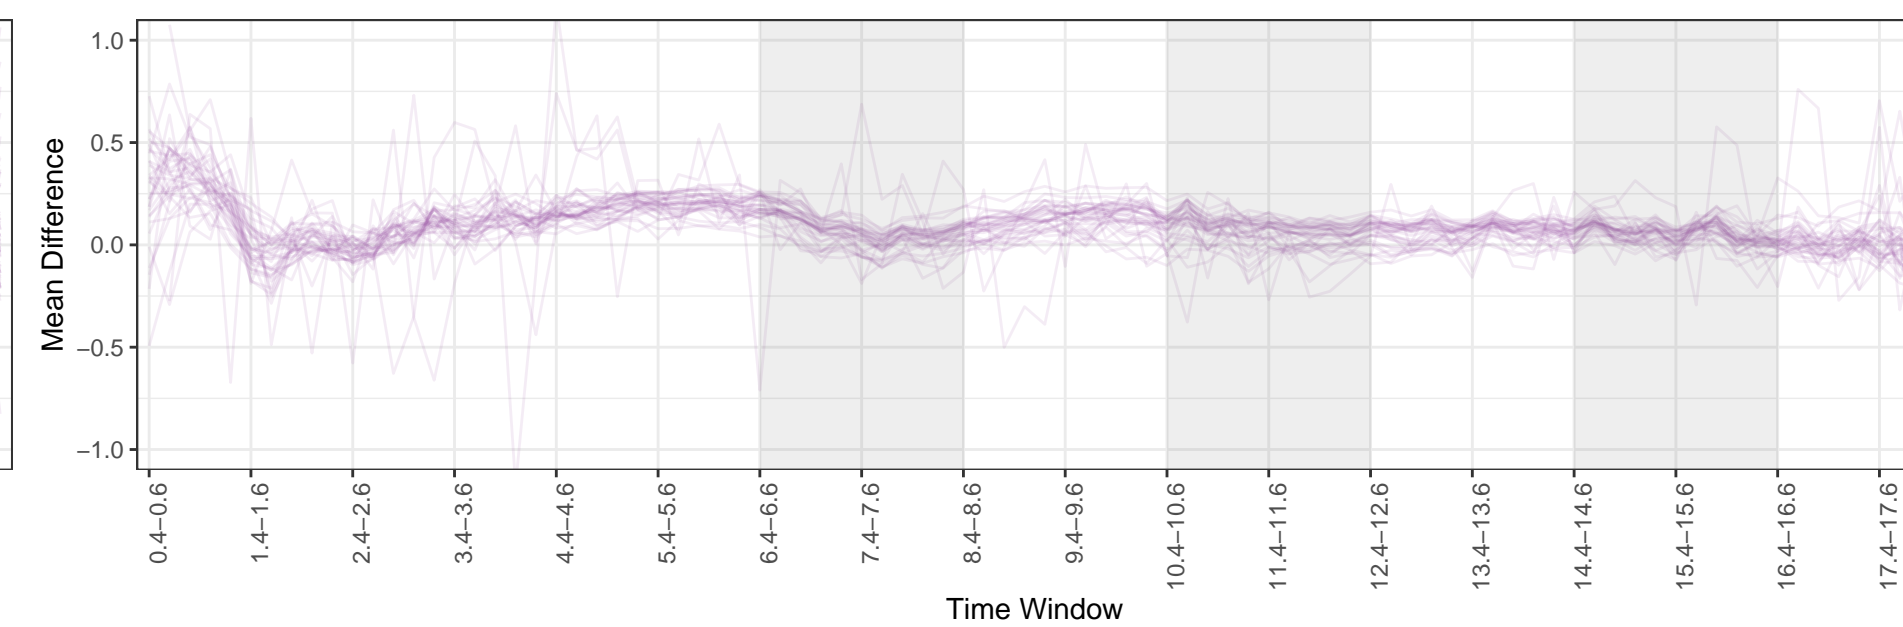

Motif knrl, accessibility score differences by loop type for Glia, group 010

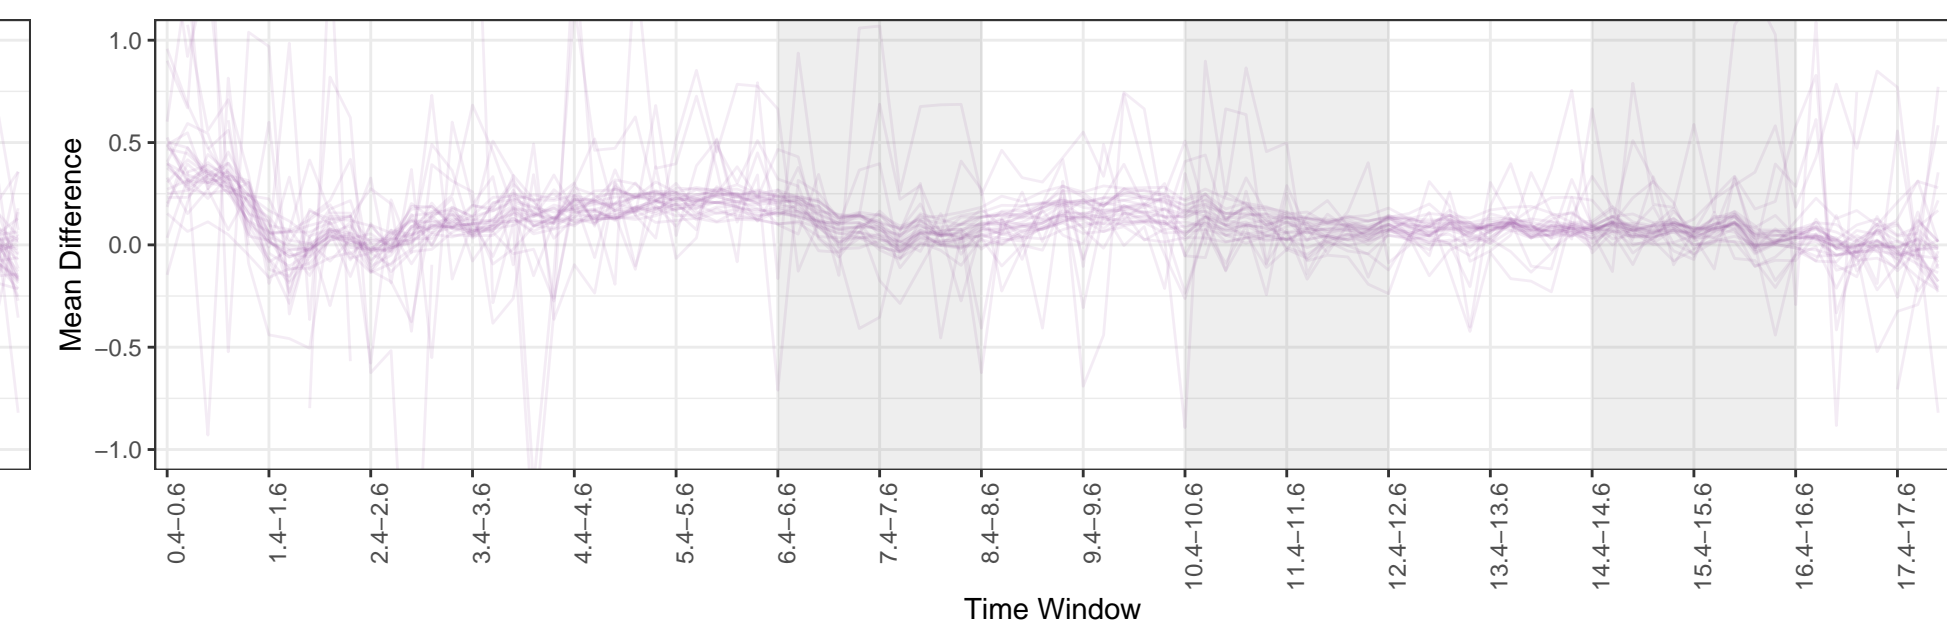

Motif knrl, accessibility score differences by loop type for Neurons, group 011

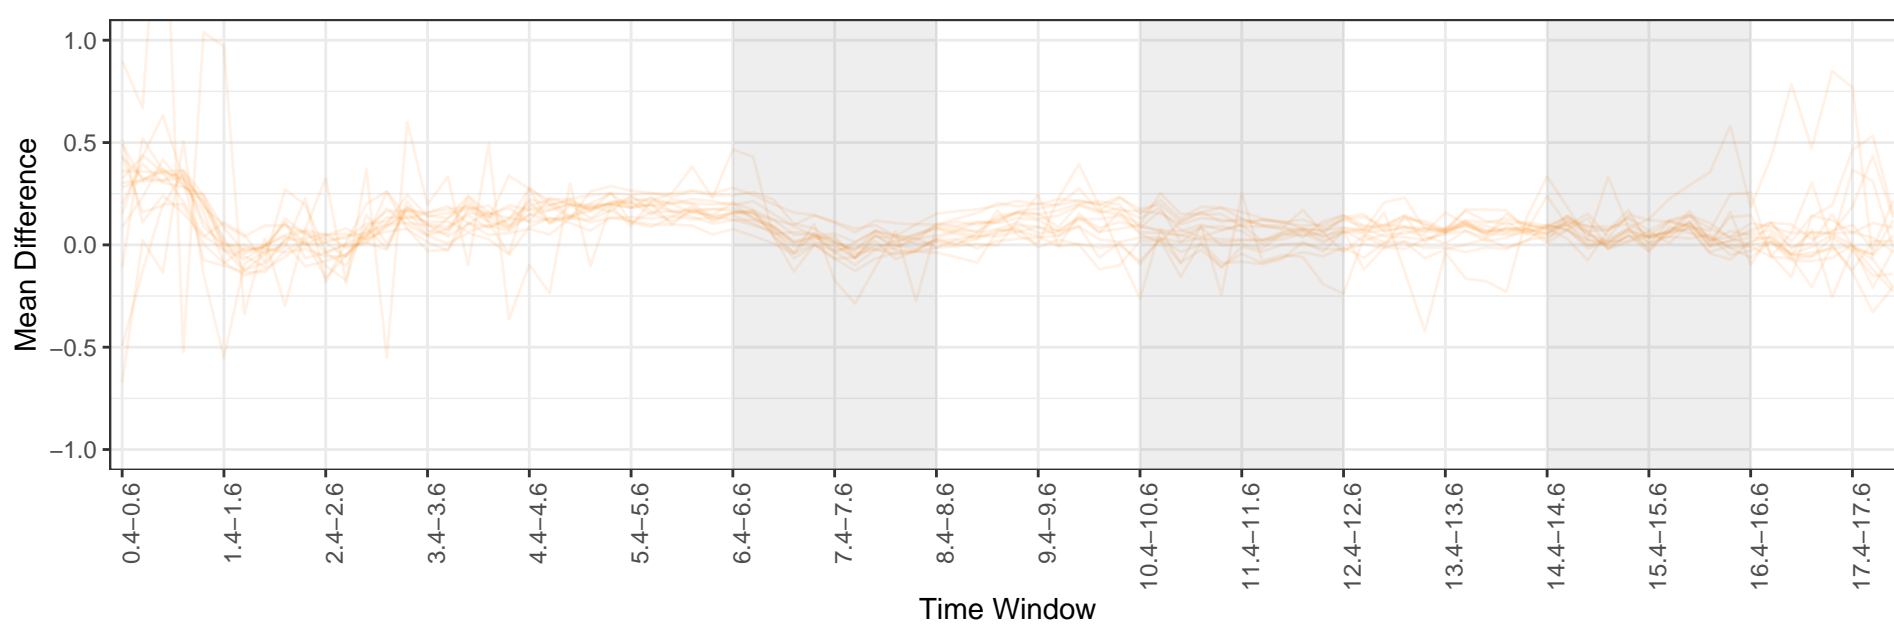

Motif knrl, accessibility score differences by loop type for Neuroblasts, group 011

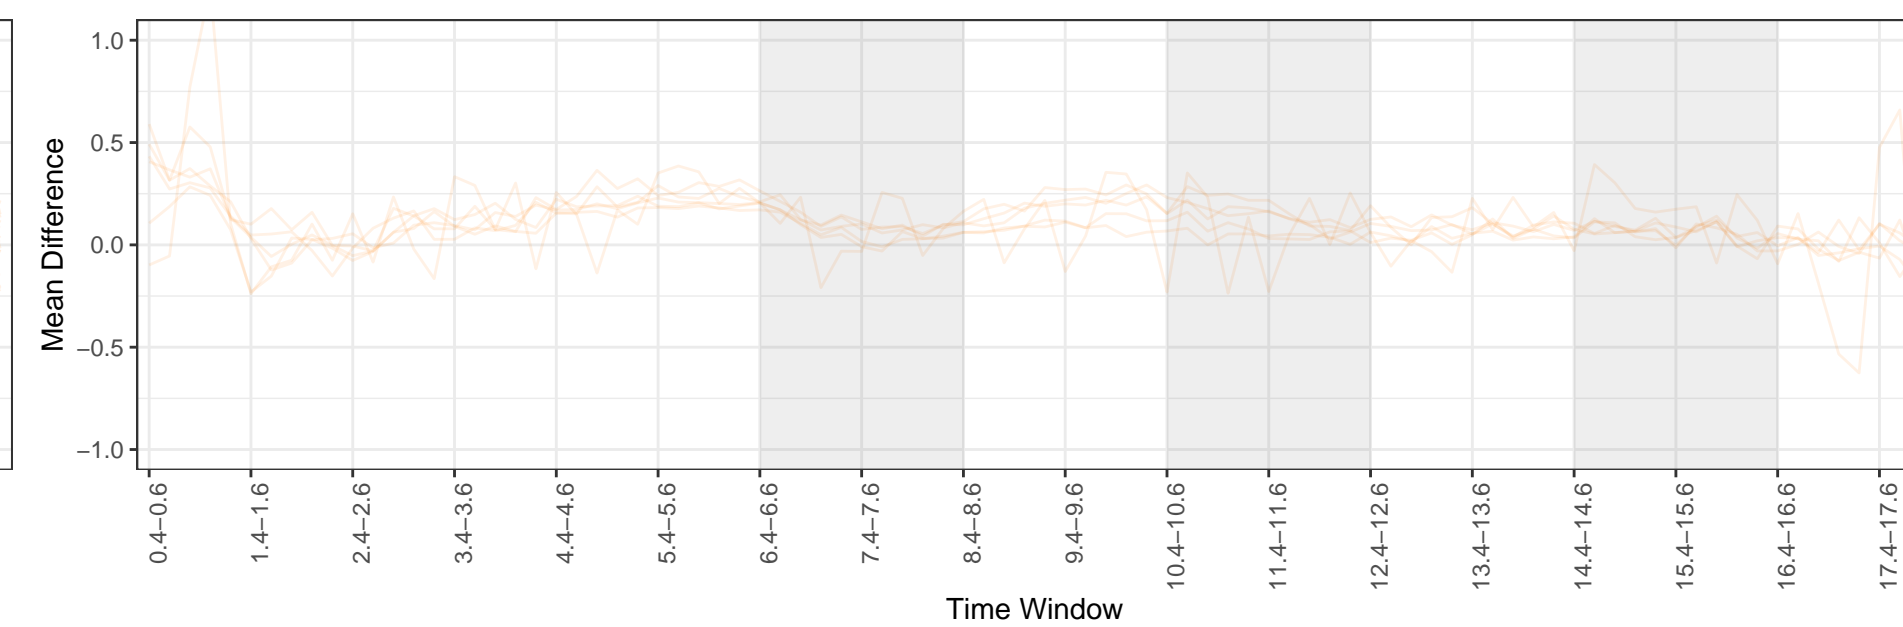

Motif knrl, accessibility score differences by loop type for Glia, group 011

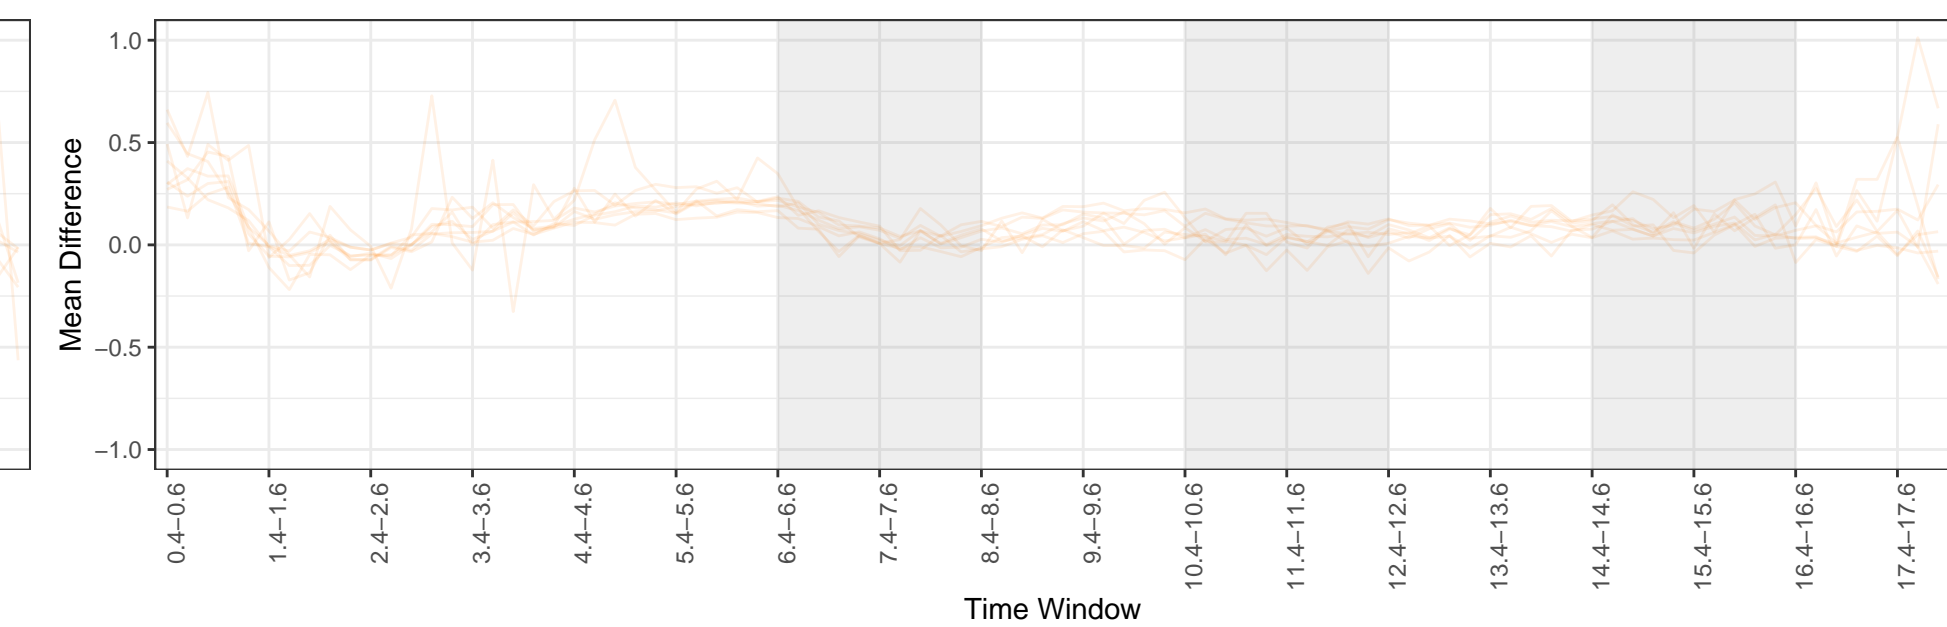

Motif knrl, accessibility score differences by loop type for Neurons, group 100

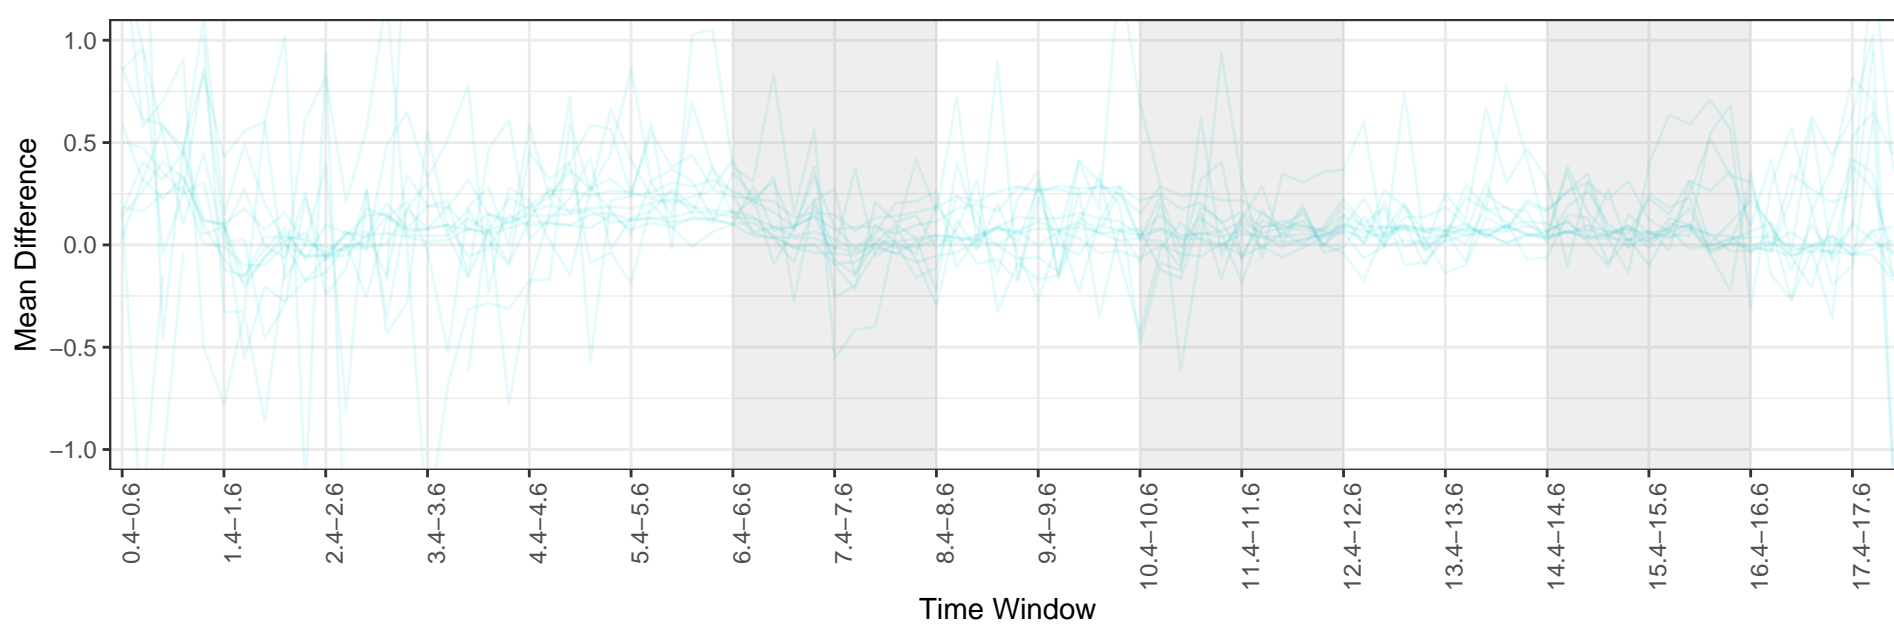

Motif knrl, accessibility score differences by loop type for Neuroblasts, group 100

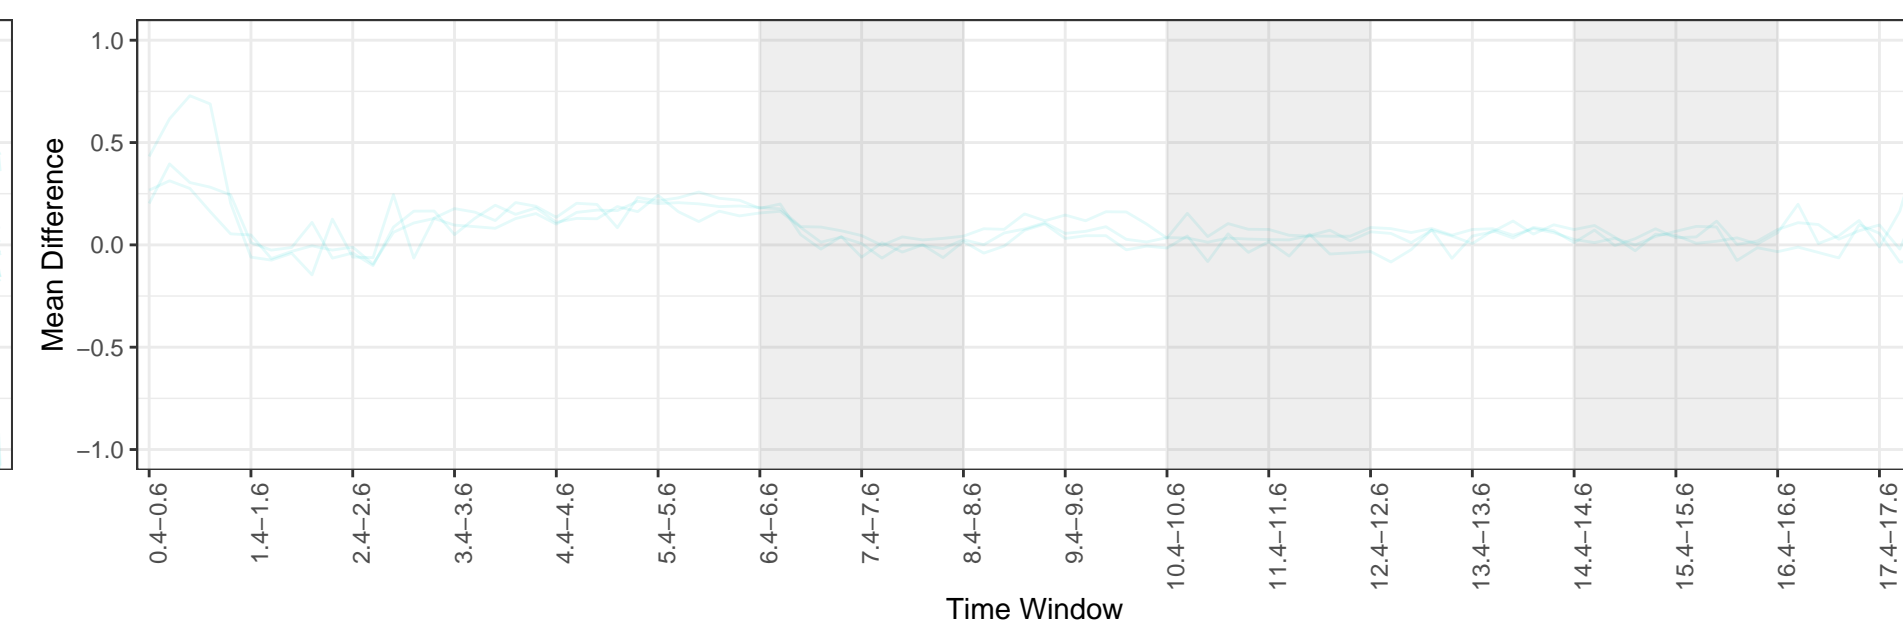

Motif knrl, accessibility score differences by loop type for Glia, group 100

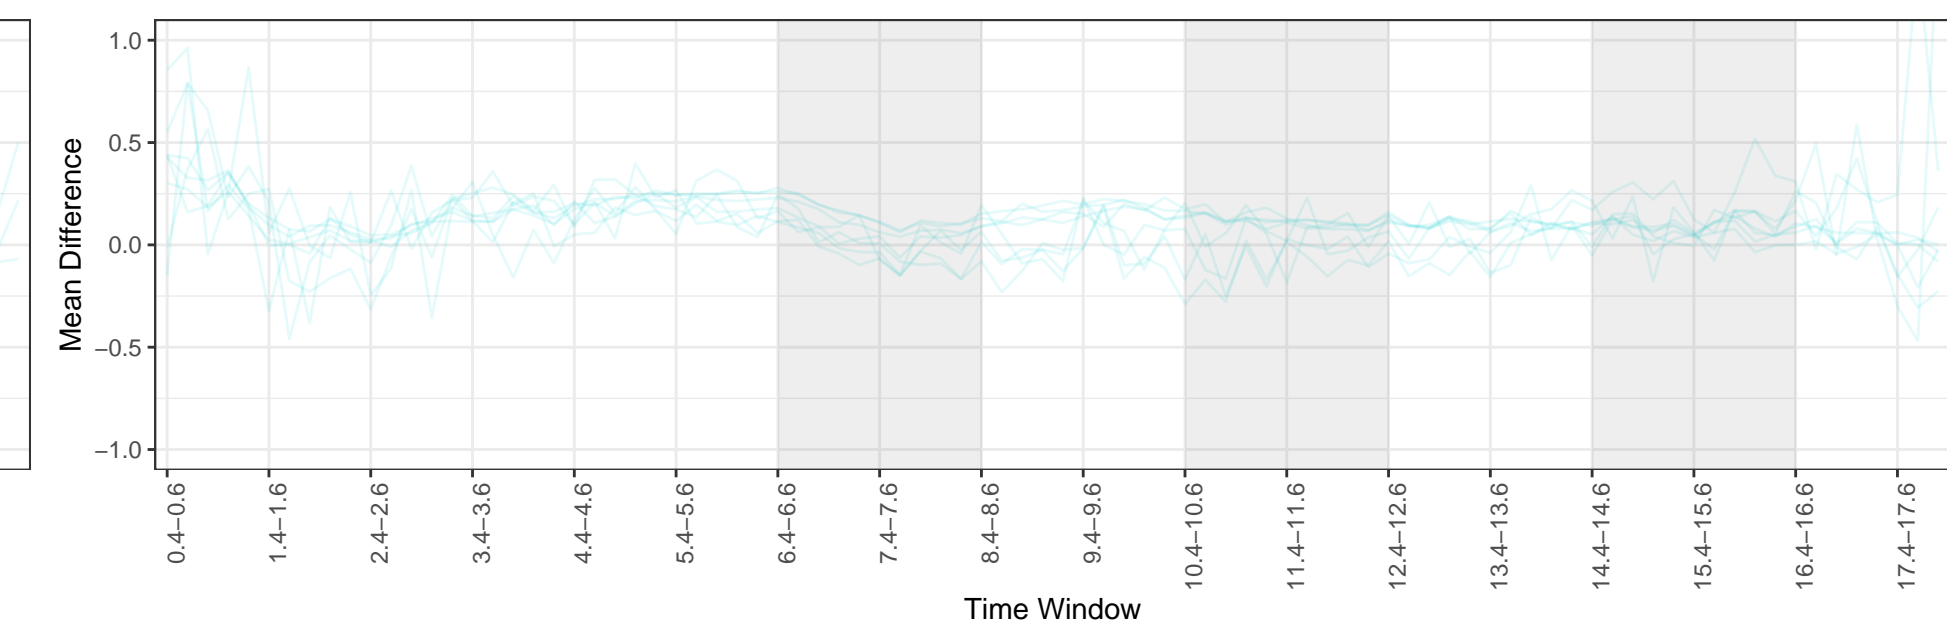

Motif knrl, accessibility score differences by loop type for Neurons, group 101

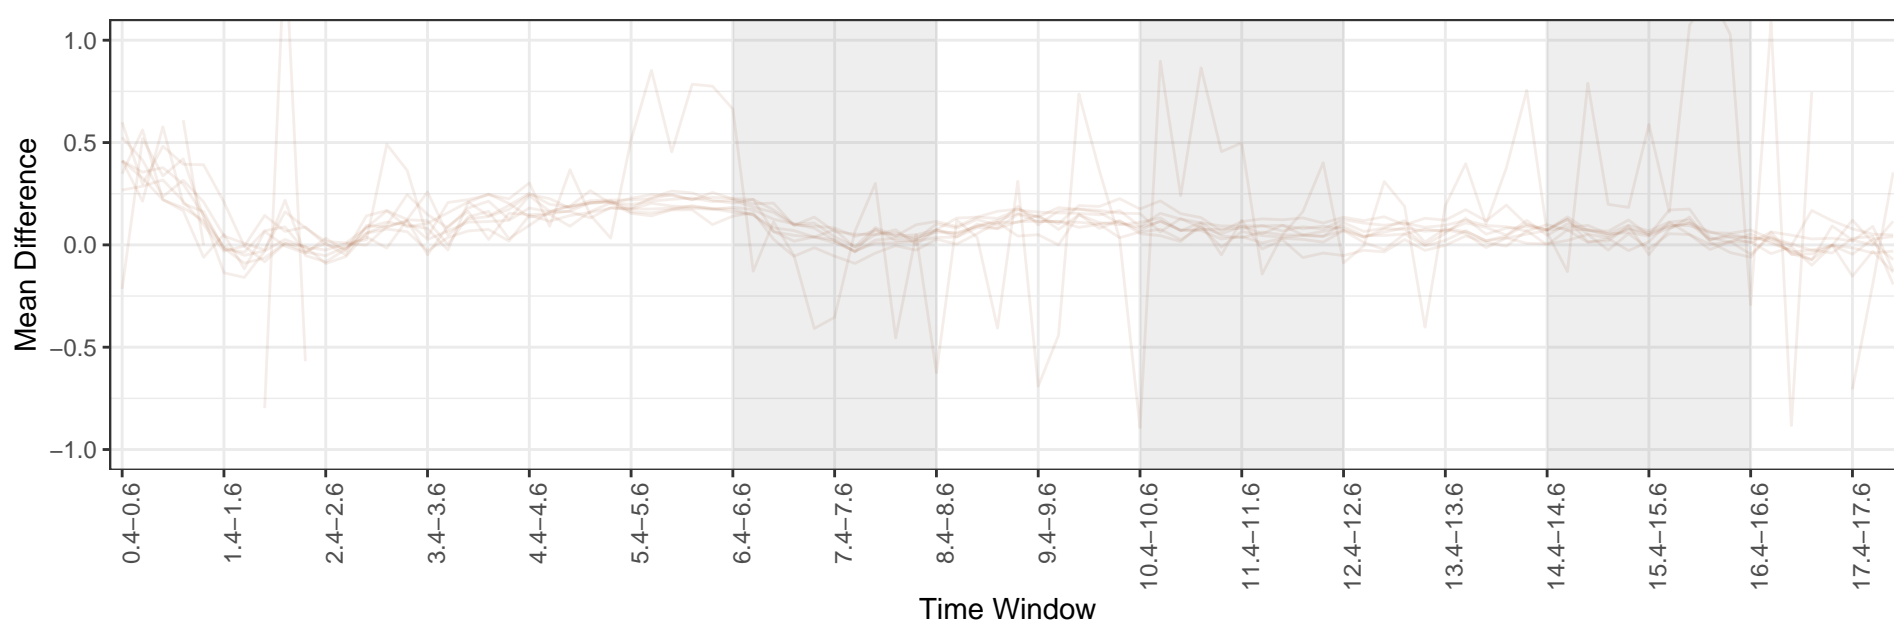

Motif knrl, accessibility score differences by loop type for Neuroblasts, group 101

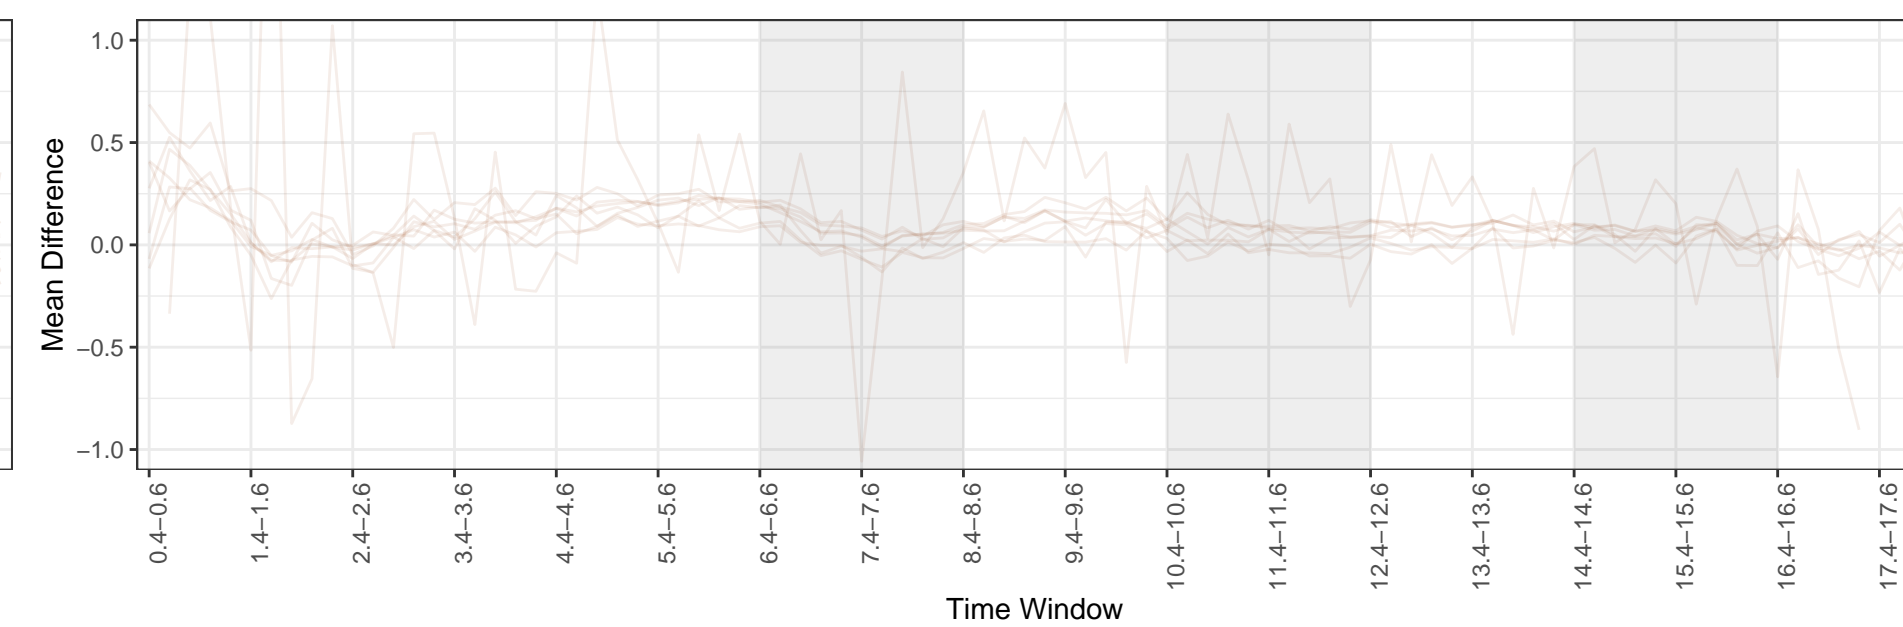

Motif knrl, accessibility score differences by loop type for Glia, group 101

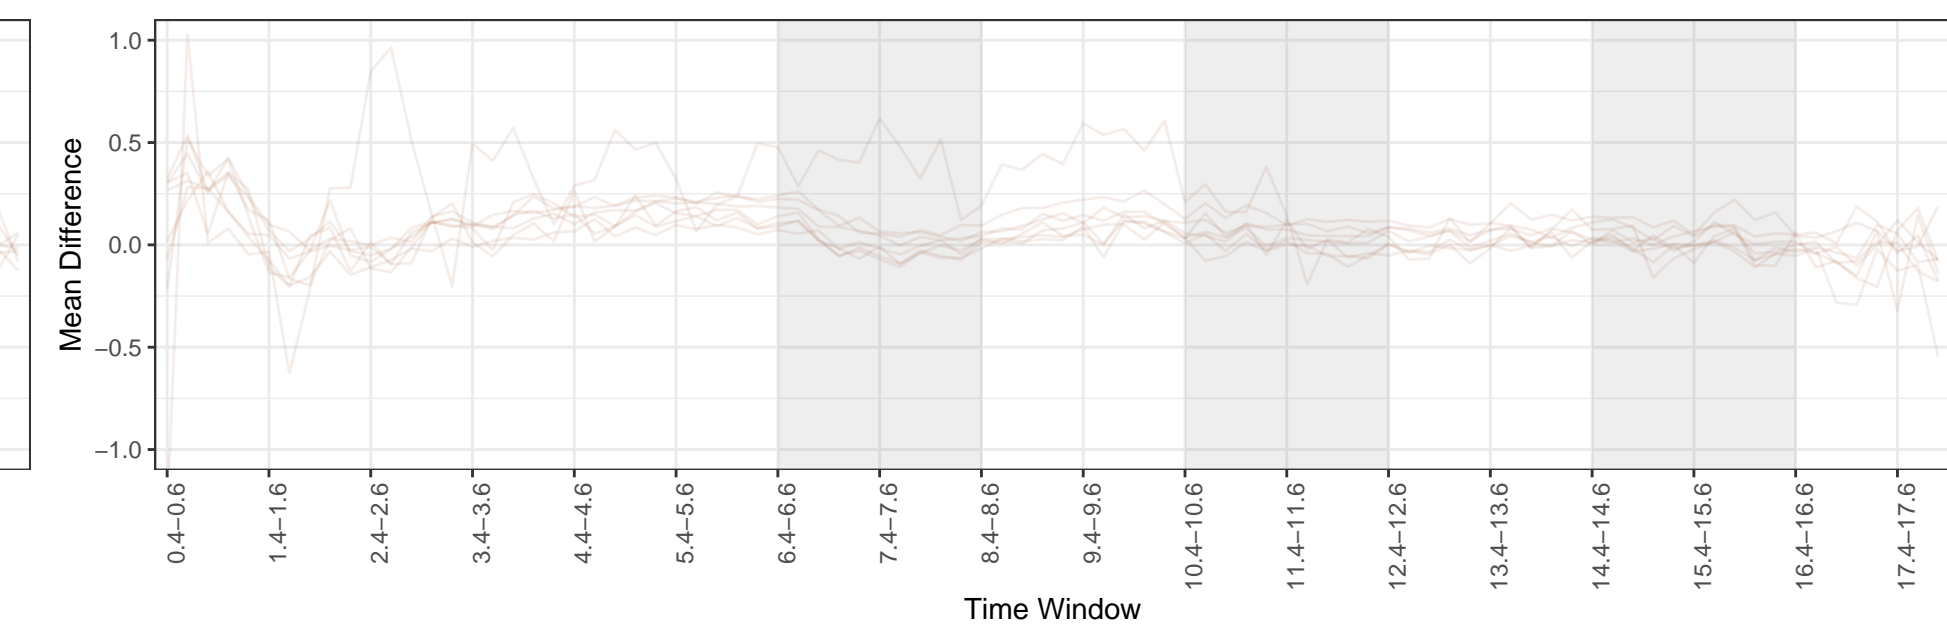

Motif knrl, accessibility score differences by loop type for Neurons, group 110

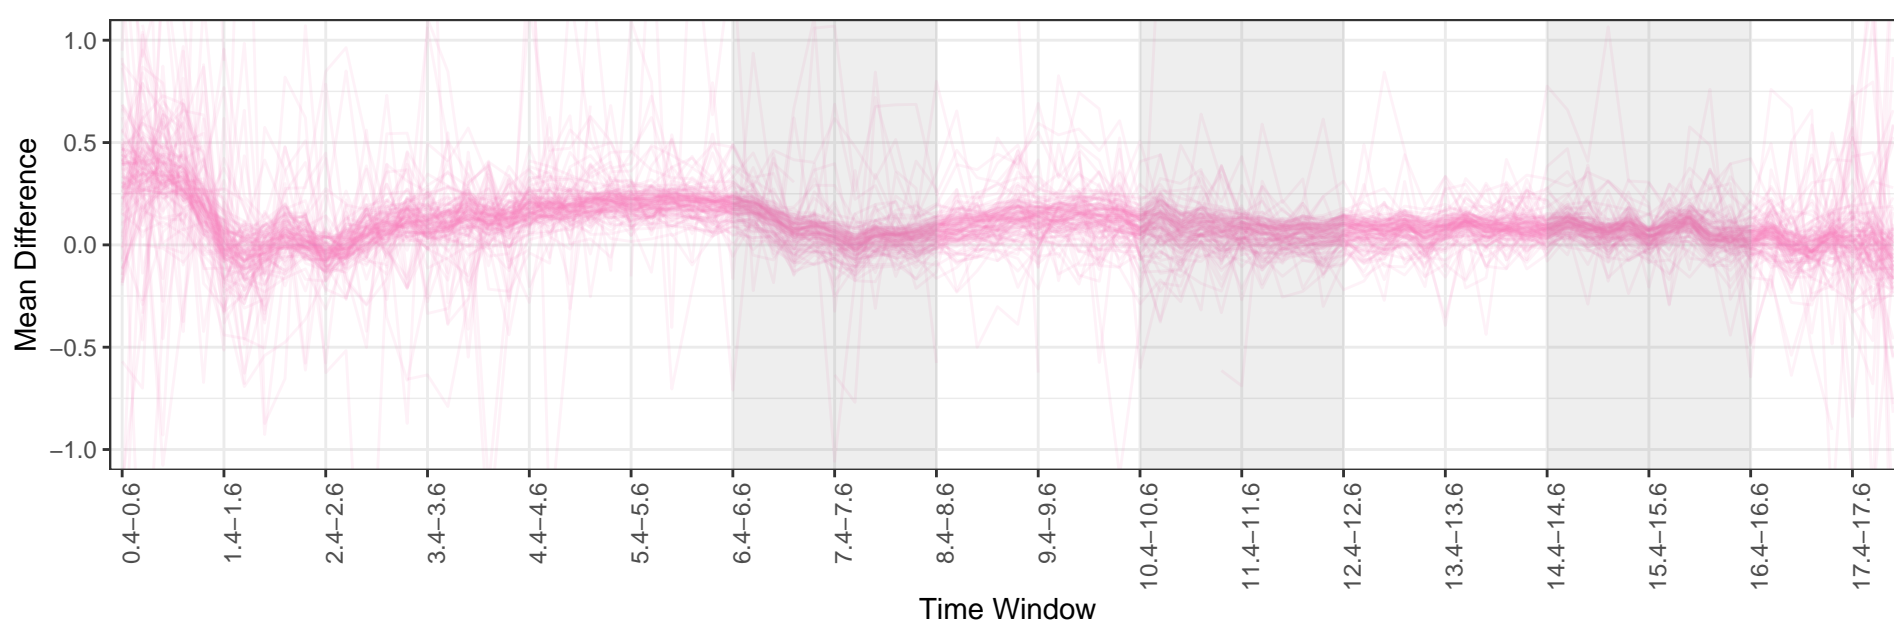

Motif knrl, accessibility score differences by loop type for Neuroblasts, group 110

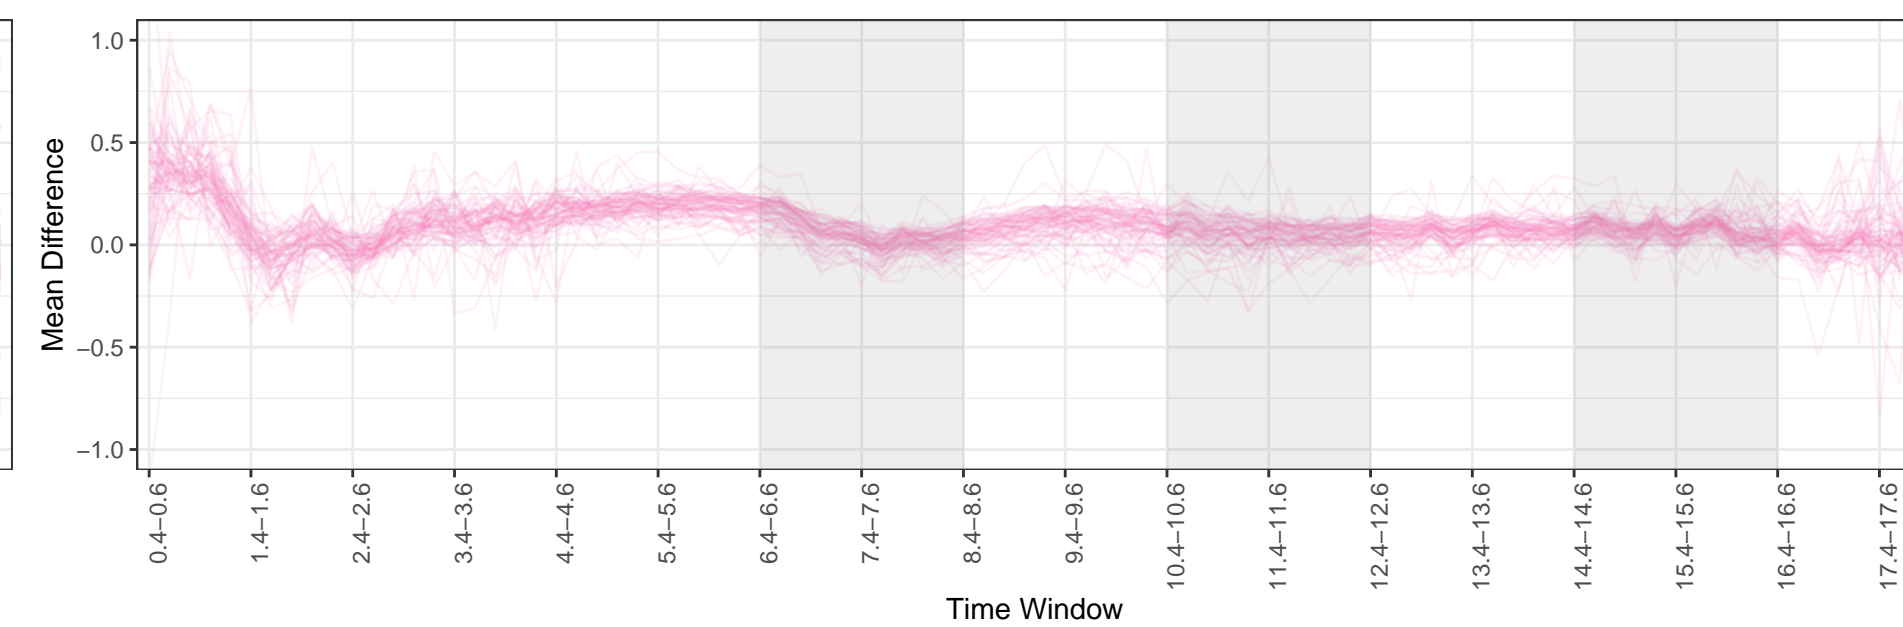

Motif knrl, accessibility score differences by loop type for Glia, group 110

Motif knrl, accessibility score differences by loop type for Neurons, group 111

Motif knrl, accessibility score differences by loop type for Neuroblasts, group 111

Motif knrl, accessibility score differences by loop type for Glia, group 111
